SUMMARY

Computer Science and Engineering student with hands-on experience across web development, backend systems, and embedded hardware projects using ESP32 and Raspberry Pi. Comfortable with real-time communication tools like Socket.IO and basic Linux command-line use, and picks up new tools and environments quickly. Received a placement offer from *Wipro* (Digital Workplace Services) after completing a Diploma in Computer Science, and is currently pursuing a B.Tech in Computer Science & Engineering while continuing to build independent projects. Looking for a hands-on technical role to apply and keep growing these skills.

EDUCATION

Bachelor of Technology (B.Tech), Computer Science & Engineering Narula Institute of Technology	Currently Pursuing 2028
Diploma in Computer Science Central Calcutta Polytechnic 86.6%, CGPA 8.8	2025
Higher Secondary (Class XII) Gobindapur Ratneswar High School 409/500	2022
Secondary (Class X) Gobindapur Ratneswar High School 520/700	2020

TECHNICAL SKILLS

Programming Languages: C, Java, Python, JavaScript
Web Development: HTML, CSS, Node.js, J-Query
Databases: MongoDB, SQL
Hardware / Embedded: ESP32, Raspberry Pi
Systems & Networking: Socket.IO / WebSocket-based real-time communication, basic Linux command-line usage

PROJECTS

- Biometric Large-Scale Voting System** — Designed a voting system using biometric verification to authenticate voters for secure, large-scale elections, built on ESP32 and Raspberry Pi hardware, integrating sensors with the control software. --- Python, Node.js, MongoDB, html, css, Flet.
- Communication Web Platform** — Built a web-based platform for real-time communication between users, using Socket.IO to sync messaging and connection state across clients in real time. --- Node.js, Socket.io, HTML, CSS, JavaScript, MongoDB.
- Cloud Kitchen Website (Backend)** — Built the backend for an online food-ordering platform project, handling menu data, orders, and user accounts. --- Node.js, MongoDB, HTML, CSS, JavaScript.
- Rules-Based Chatbot** — Developed a chatbot that parses user input against a defined rule set to generate context-appropriate responses.
- Flying Object Game** — Built a 2D arcade game with real-time object movement and collision handling. HTML, CSS, JavaScript.
- Tic-Tac-Toe** — Implemented the classic two-player game with complete win and draw logic. --- Python, Kivy.

INTERNSHIPS & CERTIFICATIONS

- | | |
|---|-------------------------|
| Data Analytics with Python Certification — Institute For Advanced Learning & Skill Development | 16/03/2026 – 20/03/2026 |
| Google DeepMind-“Build your own SLM” — Google Skills | 04/11/2025 |
| Skill Development & Internship Program, Semiconductor Technology — Jadavpur University | 08/01/2025 - 19/02/2025 |
| Backend Developer Certification — Physics Wallah | 27/10/2025 |
| Intern, CodeSoft Pvt. Ltd. | 10/09/2024 – 10/10/2024 |
| Web Development Intern, YCSAS Pvt. Ltd. | 01/11/2023 - 15/12/2023 |

INTERESTS

Chess, reading, and listening to music and audio stories.
